

CIS - Database Design Certificate

This certificate prepares the students to understand the entire database design, programming methodology and life cycle. This certificate is designed for students who require programming skills in Relational Database Management Systems (RDBMS) and Structured Query Language (SQL) techniques using ORACLE or Microsoft Access.

This program map represents one possible pathway to complete the program. Please see a counselor to create an education plan that is customized to meet your needs. This map is not a guarantee of course

availability or financial aid applicability.

Zero Textbook Costs (ZTC):

The Zero Textbook Costs designation and logo are added to any course that provides free access to all required instructional materials. These are typically shared with students through Canvas. Courses that are designated as ZTC may still require students to purchase supplemental materials such as lab coats, a calculator, art supplies, etc. See full definitions and searching tips on the [Zero Textbook Costs page](#) of the college website.
